Why is **reset** Confusing?

To understand reset**, you need to understand the three main Areas *and* Git's branches.**

reset **does different things in different contexts.**

Commands That Move Branches

commit

merge

rebase

pull

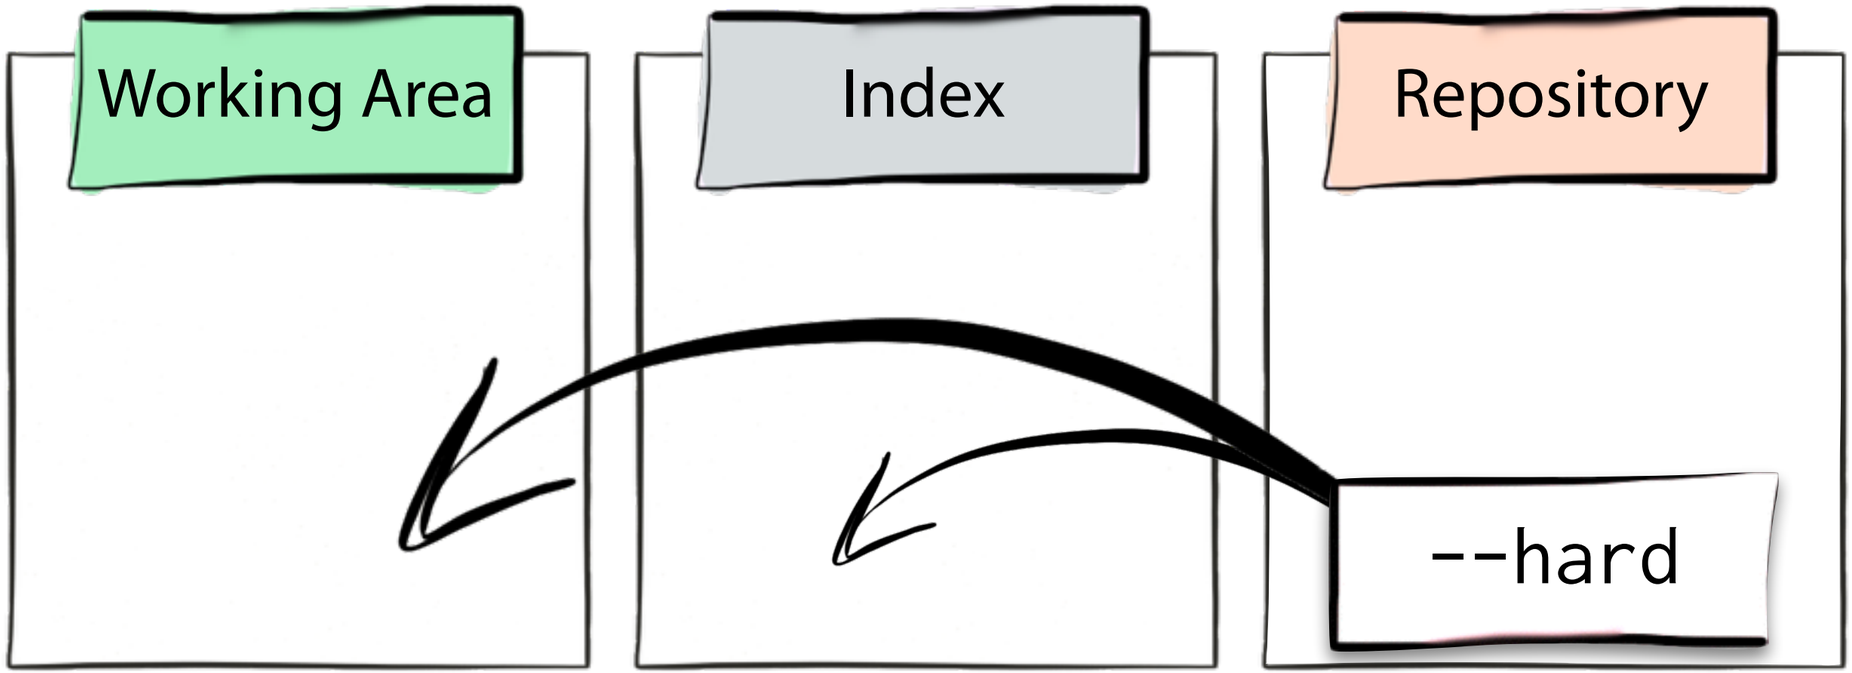
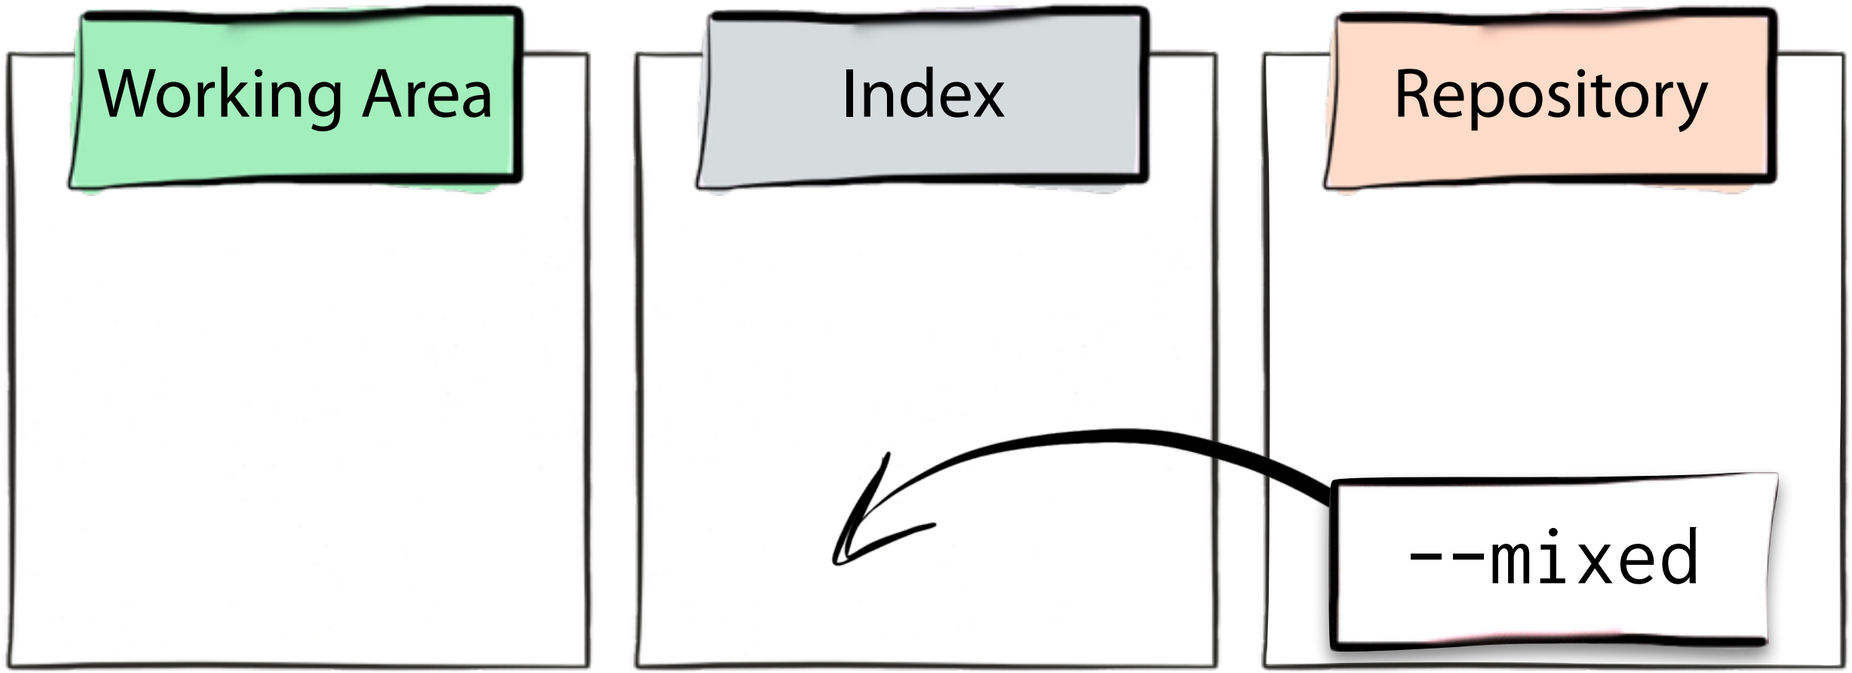
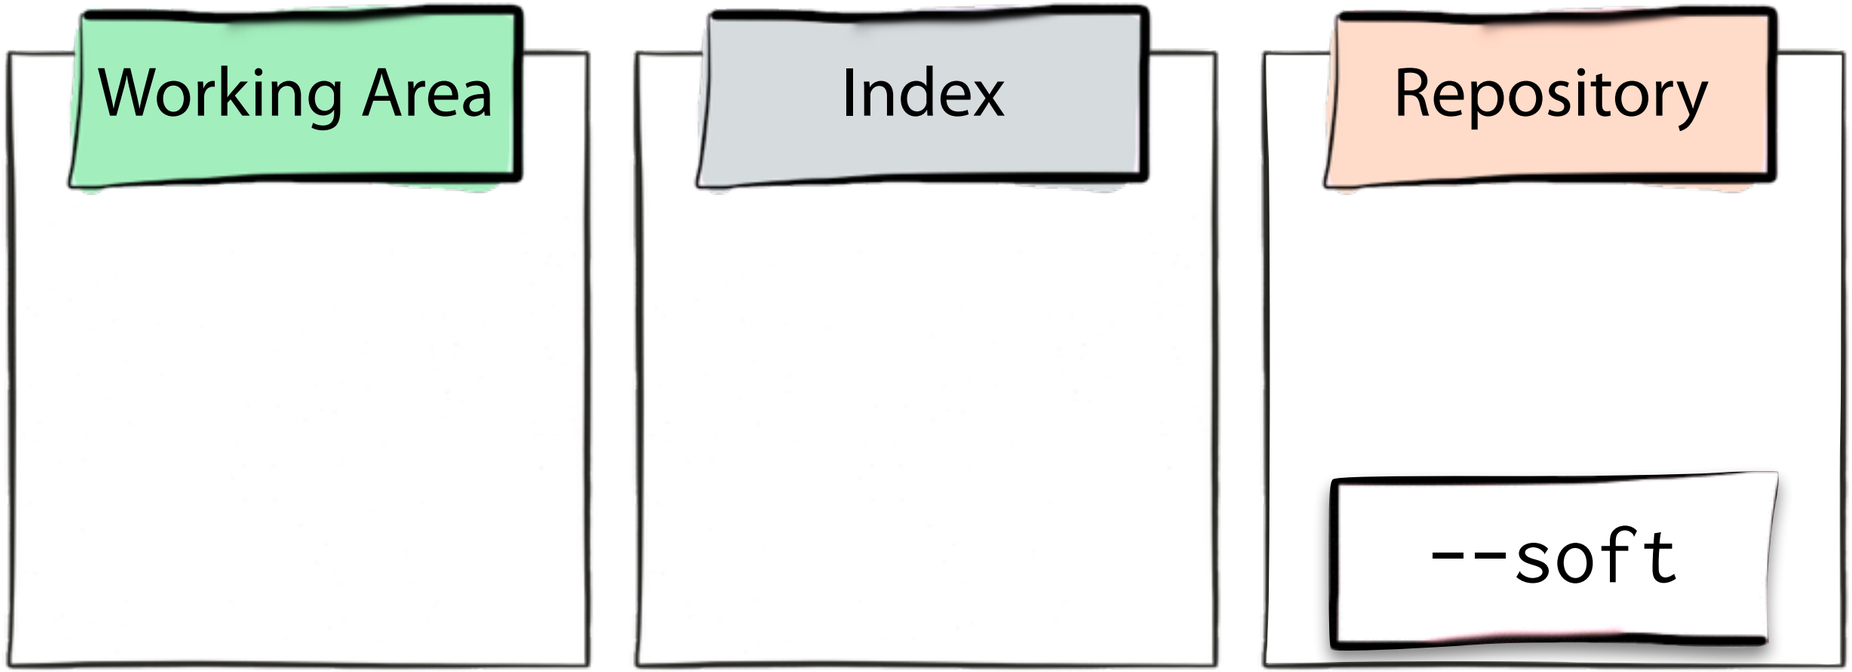
Step Two: Moving Data Across the Areas



Step Two: Moving Data Across the Areas



Step Two: Moving Data Across the Areas



reset moves the current branch, and optionally copies data from the Repository to the other areas.
